IDENTIFIERS	*Integrated Postsecondary Education Data System; *Oregon

ABSTRACT

This document presents data tables detailing postsecondary degrees awarded by public and private colleges and universities in Oregon for the academic year 1994-95. The report includes associate, bachelor's, master's, doctoral, and first professional degrees. Data are from the Integrated Postsecondary Education Data System. The document uses the Classification of Instructional Program (CIP) codes. Summary tables of degrees awarded precede the more detailed tables. Summary tables are arranged by institution, by program area (CIP code), and for first professional degrees, with each data set including separate tables broken down by racial/ethnic background in similar formats. Detailed tables are organized in two major sections: degrees awarded by each institution in segment groupings (state system, community colleges, and independent), and degrees awarded by each major program area. Each table is followed by a parallel table showing racial/ethnic breakdown in similar format. The appendix provides tables and charts which show degrees awarded in Oregon over a 10-year period. (DB)

INTRODUCTION

Degrees awarded by postsecondary institutions in Oregon are summarized in this report. These data are obtained from a completions survey administered by the U.S. Department of Education's Center for Education Statistics. The completions survey is one of a series of surveys collectively knows as the IPEDS Survey (Integrated Postsecondary Education Data System) which replaced the HEGIS survey in 1987.

Data on postsecondary degrees were published annually by this office from 1968-69 to 1989-90. Then there was a gap in publication until the 1993-94 report was completed. This report is the 1994-95 edition. The report, *Certificates Awarded 1994-95* is also available by request. This may be the last report of this type of detail published. We expect to do a table showing the total number of degrees by institution, segment and degree for 1994-95 and 1995-96.

The system for classification of instructional programs used in this report is the same system that is used by the National Center for Education Statistics. This scheme, known as CIP Codes consists of groups of instructional programs termed "program areas" in this report, such as Education; and subcategories we refer to as "specific programs," such as Education Administration, within each of the broad program areas.

In this report, summary tables of degrees awarded precede the more detailed tables. Summary tables are arranged by institution, by program area (CIP Code), and for first professional degrees followed by tables showing racial/ethnic background in similar formats. Detailed tables are organized in two major sections: degrees awarded by each institution in segment groupings (State System, Community Colleges, and Independent), and degrees awarded by each major program area. Each table is followed by a table showing racial/ethnic breakdown in similar format.

This report summarizes only associate, bachelor's master's, doctoral, and first professional degrees. Associate degrees are awarded upon completion of the requirements for two-year programs at community colleges and other institutions. First professional degrees are awarded in fields such as law, medicine, and theology.

In the Appendix are some tables and charts which look at degrees awarded in Oregon over a ten-year period.

HIGHLIGHTS AND COMPARISONS

(See Appendix.)

- In the academic year 1994-95, there were 24,206 degrees awarded in Oregon. This was down slightly from the preceding peak year and up 22 percent for the ten-year period then ended.

- Independent colleges in 1994-95 year conferred 29 percent of bachelor degrees, 32 percent of master degrees, and 65 percent of first professional degrees. The state system conferred 87 percent of academic doctor's degrees.

Over the ten-year period ending with 1994-95:

- Total degrees awarded increased by 33 percent in community colleges, by 43 percent in independent colleges, and by 10 percent in the state system.

- Associate conferrals grew by 33 percent in community colleges and declined in both independent colleges and the state system.

- Bachelor conferrals grew by 50 percent in independent colleges and by 9 percent in the state system.

- Master conferrals grew by 231 percent in independent colleges and by 29 percent in the state system.

- Doctor conferrals grew by 233 percent in independent colleges and by 6 percent in the state system.

- First professional conferrals declined in both sectors.

- Women gained a larger proportion of degrees conferred in total and at every degree level.

- Hispanics and Asians or Pacific Islanders made slight gains in share of total degrees conferred.

(Note: The years between 1989-90 and 1993-94 were not entered into our computer or published.)
